

Response to COVID-19

- **Safety comes first.** We are taking the necessary cautionary measures and working to keep our studies going for patients and families alongside this.
- FREESIAS has **many home-based activities** (diaries, questionnaires) and digital devices.
- This is a strength during this time, as it is possible for us to continue to support the study families to **continue to participate actively in FREESIAS from home.**

What can continue:

- Sleep mat
- Sleep diary
- Seizure diary

What will be paused:

- Site visits
- Home visits (EEG/PSG)
- Actigraphy around home visits

*****STAY TUNED*** We will return to full activities as soon as possible. Please stay in touch with your site.**
