

Understanding social communication and motor skills

Drs. Inge-Marie Eigsti, Holly Fitch and Stormy Chamberlain from the University of Connecticut are doing a research study of social communication and motor skills in autism and genetic disorders of Chromosome 15.

What's involved?

- We are interested in the development of social communication and motor skills.
- You can participate online – no need to leave home!
- Parents will complete a 40-60 minute online survey.
- Families will receive \$30.

Who can participate? Anyone ages 3-80 who:

- Has access to an online computer and a webcam
- Has a caregiver who can provide information
- Has Angelman syndrome, Dup15q syndrome, or autism spectrum disorder

Contact us for more information:

- Elise Taverna at (860) 486-3085 or angelman@uconn.edu
