

# Do you have an ADULT child with Angelman syndrome?

Participate in a study on gut function and diet through Purdue University!

## WHAT IS THE GOAL OF THIS STUDY?

The purpose of this study is to look at gut function in Angelman syndrome and its relationship to behaviors and diet. All study activities will be conducted from home.

## WHO IS ELIGIBLE?

Families with an ADULT child with AS and a biological parent. All participants must be 18-70 years of age.

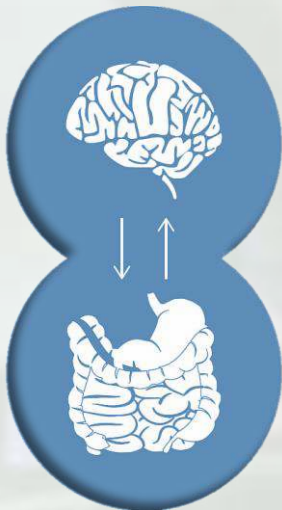

## WHAT DOES PARTICIPATION INVOLVE?

All materials will be mailed to and from families and shipping will be paid for. The study will last 4-5 weeks.

Participation may include:

- (1) **Stool Collection:** Families will collect 3 stool samples from themselves and from their child. All materials and instructions will be provided.
- (2) **Online Parent Surveys:** Families will complete online surveys about their family's and child's characteristics.
- (3) **Phone Surveys:** Families will complete an initial phone interview about their child's development and 3 brief phone calls about their own and their child's diet.

Families will receive \$100 of Amazon gift cards for their time.
